## PREVIOUS WORK EXPERIENCES

DISH Network

Denver, CO

Business Process and Technology

July 2016 - August 2017

Business Operations Analyst

As the Product Owner of the customer self-service website, I:

- Prioritize projects, write business requirements and work with software developers to implement and test enhancements to the customer self-service website
- Develop digital engagement projects and present them to department vice president for review and approval
- Work cross-functionally with other business units to deliver critical updates and strategic initiatives on the website

The Boeing Company

Bellevue, WA

Core Infrastructure Engineering: Centralized Services: Server Monitoring & Compliance

May - August 2015

Systems Integration Intern

- Collect, analyze and present data to management on server health, security compliance, and ticket handling
- Collaborated with 20 managers to update their disaster recovery plans in prep for a quarterly audit
- Security Compliance Project: Developed a Visual Basic macro to automate email communications informing responsible parties of server security vulnerabilities and corrective actions to be taken

Premier, Inc.

Charlotte, NC

Technology Administration Intern

May - August 2014

- Conducted interviews with stakeholders and documented requirements to prepare for the integration of a new information system for server metadata
- Led processes of data mining, cleansing and validating to prepare server metadata to be uploaded to new information system

Clemson University Academic Success Center

Clemson, SC

Manager of Student Tutors (promoted from position as Calculus Student Tutor)

August 2013 - December 2015

- Develop plan for onboarding of 150 new student tutors each semester, verify and organize work documents, and work with administration to implement programmatic changes
- Oversee, mentor and build community within a group of Calculus student tutors
